

US

The job: Business Analyst

Our business analysts quickly understand complex business processes and develop credible, practical and creative ideas for how technology can improve them.

You will work very closely with our high-profile clients and spend time on site, which may include the opportunity to travel outside London and abroad.

We give responsibility for owning projects quickly, so being able to create and execute a plan independently, meticulously and efficiently is expected from the start.

Exceptional written and verbal communication skills and an ability to interact with different audiences, both internal and external, are needed and expected.

We are

- A consulting and technology business that helps companies that are trying to grow, but where technology is holding them back.
- A team of experienced, motivated, and creative Software Engineers, Data Analysts and Consultants.
- Currently a start-up but growing fast, with big-name clients and partners and an exciting pipeline of work.

We have

- A software platform called **Schematiq** that supercharges and automates spreadsheet processes and drives our differentiation.
- Big and small clients: from FTSE 100 companies through to small accountancies.
- An entrepreneurial spirit and a drive to put people and culture at the core of our growth strategy.
- A preference for capability and attitude over experience.
- An ambitious growth strategy, with our first investment just closed and more on the way.
- A great new office 2 minutes' walk from Portobello Road Market.

YOU

You are

- Someone who routinely exceeds expectations.
- Capable of writing and delivering presentations to a range of audiences including at CTO/CEO level.
- Credible working with senior client stakeholders.
- A listener and someone who asks questions that get to the core of a problem.
- Calm and confident; you think on your feet and are not ruffled when plans change.
- Ready to be practical and turn your hand to the priorities of the moment to get stuff done.
- Organised and able to create a plan, report progress and ask for feedback without prompting.

You have

- 2-5 years' experience as a business analyst involved in projects from inception to completion.
- Designed improvements to processes featuring both business and technology changes.
- An ability to prioritise change by the value it delivers, and experience writing business cases.
- An awareness of project planning, tracking and stakeholder management.
- Excellent MS Excel and good MS PowerPoint skills.
- A good degree in a numerical or scientific field.

You may have

- A background in consulting or experience in a finance, insurance, energy or trading company .
- Analytics or modelling experience.
- Tableau, Alteryx, PowerBI knowhow.
- Lean / Operational improvement experience.
- Exposure to any of SQL, VBA, Python or R.

You will get to

- Engage with companies leading the way in their fields and solving their complex challenges.
- Work within a growing environment where your input will make a huge difference.

To apply, please email a CV and covering letter to recruitment@htilabs.com
